Tran, C. V. & Dritschel, D. G. Impeded inverse energy transfer in the Charney–Hasegawa–Mima model of quasi-geostrophic flows, 435–443

Uhlmann, M. & Nagata, M. Linear stability of flow in an internally heated rectangular duct, 387–404

Weihs, D. *See* Barta & Weihs

Werne, J. *See* Sprague, Julien, Knobloch & Werne

E. Barta & D. Weihs	Creeping flow around a finite row of slender bodies in close proximity	1
M. R. Cholemari & J. H. Arakeri	A model relating Eulerian spatial and temporal velocity correlations	19
D. Crowdy & J. Marshall	The motion of a point vortex through gaps in walls	31
N. Mujica & D. P. Lathrop	Hysteretic gravity-wave bifurcation in a highly turbulent swirling flow	49
M. Branicki & H. K. Moffatt	Evolving eddy structures in oscillatory Stokes flows in domains with sharp corners	63
O. M. Faltinsen, O. F. Rognebakke & A. N. Timokha	Resonant three-dimensional nonlinear sloshing in a square-base basin. Part 3. Base ratio perturbations	93
R. P. Pawlowski, A. G. Salinger, J. N. Shadid & T. J. Mountziaris	Bifurcation and stability analysis of laminar isothermal counterflowing jets	117
M. Sprague, K. Julien, E. Knobloch & J. Werne	Numerical simulation of an asymptotically reduced system for rotationally constrained convection	141
A. Revuelta, J. Rodríguez-Rodríguez & C. Martínez-Bazán	Bubble break-up in a straining flow at finite Reynolds numbers	175
R. Benzi, E. De Angelis, V. S. L'vov, I. Procaccia & V. Tiberkevich	Maximum drag reduction asymptotes and the cross-over to the Newtonian plug	185
M. Oliver	Variational asymptotics for rotating shallow water near geostrophy: a transformational approach	197
D. Fabre, D. Sipp & L. Jacquin	Kelvin waves and the singular modes of the Lamb–Oseen vortex	235
D. Martinand, P. Carrière & P. A. Monkewitz	Three-dimensional global instability modes associated with a localized hot spot in Rayleigh–Bénard–Poiseuille convection	275
P. Gao & X.-Y. Lu	Effects of wall suction/injection on the linear stability of flat Stokes layers	303
M. Sugihara-Seki	Transport of spheres suspended in the fluid flowing between hexagonally arranged cylinders	309
Z. Huang & C. C. Mei	Wave-induced longitudinal vortices in a shallow current	323
T. N. Swaminathan, K. Mukundakrishnan & H. H. Hu	Sedimentation of an ellipsoid inside an infinitely long tube at low and intermediate Reynolds numbers	357
M. Uhlmann & M. Nagata	Linear stability of flow in an internally heated rectangular duct	387
R. J. Hill	Transport in polymer-gel composites: theoretical methodology and response to an electric field	405
C. V. Tran & D. G. Dritschel	Impeded inverse energy transfer in the Charney–Hasegawa–Mima model of quasi-geostrophic flows	435
